Letter of Recommendation

To whom it may concern,

Mpowered is much more than just a B-BBEE software solution. It is a more efficient and effective way for Discovery to do B-BBEE. The implementation of the BEE Toolkit has changed our focus from manually compiling scorecards across all elements, to providing us with a real-time consolidated scorecard at the click of a button. Since we implemented the Mpowered BEE Toolkit, we are able to set realistic targets across business, and compile different scenarios before agreeing on an implementation strategy. The user friendly system has mitigated the risk of incorrect reporting due to possible data integrity issues. Mpowered provides us with the ability to not only view our various scorecards, but run different scenarios, to track actions agreed to with business, measure progress and provide us with a consolidated scorecard across multiple measured entities on both the Generic and Financial Sector Scorecards. The Verification Manager supports our B-BBEE verification process by providing guidance with respect to the requirements and enables our Verification Agency to access the system remotely to ensure our data security requirements are adhered to. Finally, when required B-BBEE specialists are available to us via the LiveChat service to answer any questions we may have.

We recommend the use of Mpowered to solution your B-BBEE reporting requirements.

Kind regards,

Sharon Cuff | Skills Development Facilitator | Leadership and Learning | Discovery People
