

RSC EKUSASA MINING

RSC Ekusasa Mining - an established manufacturing company, a supplier of roof support products and systems to the mining industry - approached Mpowered to assist with their B-BBEE challenges.

As with most companies, RSC Ekusasa Mining was under pressure from debtors for a B-BBEE compliance rating. As is apparent in the environment, it is essential to maintain a good Level as this secures a healthy relationship with debtors.

Knowing that RSC Ekusasa Mining had to be B-BBEE compliant, but having no insight into how to achieve this, was a challenge. No accurate projection or forecast could be done to map the B-BBEE compliance journey.

By implementing the BEEToolkit, RSC Ekusasa Mining were able to track and measure a live scorecard using the Scorecard Calculator and could easily identify low hanging fruit and achievable gaps to increase their compliance. RSC Ekusasa Mining also outlined areas of improvement quickly within the Management Control and Skills Development tools within the BEEToolkit, allowing for easy optimisation of the company's score.

With Mpowered's help, and the use of the BEEToolkit and Supplier Management System, RSC Ekusasa Mining was able to move from a Level 8 to a Level 4 B-BBEE status.
