

THE BIOVAC INSTITUTE

The Biovac Institute, a reputable company specializing in importing, exporting, packaging, testing and distributing vaccines, was experiencing challenges within the Enterprise and Supplier Development element of B-BBEE.

The Biovac Institute had significant gaps in sourcing alternative strategic suppliers, resulting in a less than optimal procurement score. It was difficult to map out all EME's and QSE's Level 1 suppliers and manage Supplier Development and Enterprise Development contributions.

As a solution, The Biovac Institute adopted the BEEToolkit and used the Scenario Planner to successfully develop an annual Supplier Development strategy. The strategy was easy to measure as live data was uploaded monthly into the Scorecard Calculator to track the on-going gaps and adjust the strategy accordingly. The software allowed for better cohesion amongst element champions in meeting internal targets collectively.

Having the Mpowered BEEtoolkit, The Biovac Institute was able to report effectively and have successfully optimised their score, moving from a Level 4 to a Level 1 B-BBEE status.
