

CHAVANI (PTY) LTD

A well-established construction company, Chavani (Pty) Ltd, approached Mpowered to assist them with the following issues:

- Subjective interpretation of B-BBEE codes by verification agencies which made it difficult to project accurate scores.
- Management Control being verified based on current employment figures rather than measurement period figures.
- Leviable amount being based on current employment figures instead of verification period figures.

Mpowered were able to solve these issues by providing expertise in understanding best practice of interpretative issues with verification agencies; forecasting using the Scenario Planner on BEEToolkit; identifying gaps to target and close using the Gap Analysis feature.

The results were significant in that Chavani (Pty) Ltd was able to implement all relevant changes and recommendations, as well as look at changes to their Ownership Structure, to exceed in reaching a Level 1 B-BBEE status.
