

# CONCOR CONSTRUCTION

Concor Construction - a company delivering solutions in building, civils, roads and earthworks construction, opencast mining, property development and emerging capabilities within infrastructure operations and maintenance - approached Mpowered to assist with their B-BBEE compliance management.

It was essential that Concor Construction maintain a good B-BBEE status Level in order to secure opportunities within their industry. The tender process allocated for a scrutiny of Ownership and Preferential procurement, so Concor Construction had to ensure that compliance was tracked in detail. Concor Construction had to maintain or better their scoring in order to keep a competitive edge.

Mpowered's BEEToolkit was initiated, with specific use of the Scorecard Calculator, to ensure that effective tracking was done on a monthly basis. As a result of the consistencies and transparency generated from the software, awareness amongst all stakeholders increased. Managers and non-managers were responsible for delivering their best Level and the software drove accountability and transparency. The reports derived from the system were good enough to be presented at a company board level.

The BEEToolkit and Supplier Management System assisted in the positive transformation within the business, as well as an improved B-BBEE status Level. The impact from having a progressive Level tracked through the system was a positive image in the marketplace which directly resulted in better opportunities when tendering.
